

HEARTWOOD, SITE FOR TRANSFORMATIVE ARTS, CULTURE. SCIENCE
PRESENTS:

THE NATURE OF EVIL & THE CHALLENGE TO BE FULLY HUMAN - Online Heartwood Conference

Ongoing lockdowns and restrictions inhibiting free gatherings and travel have made introductory online workshops a temporary option, with the full conference to follow later in 2022. With these online sessions, we would like to engage your interest, contribute to your insight and inspire you towards your own research. Out of this cross-pollination and inspiration, we hope we can together build deep, authentic conversations during our face-to-face conference.

Our focus for the conference remains on what it means to be truly human. The spiritual challenge of our time includes threats to our psychological, spiritual, social and physical integrity and well-being, at both a personal and a collective level. Our response needs to be born out of spirit recollection, creativity, compassion and integrity.
