Please add your name & date of session/s you'll attend

THE HEART IN THE RADIANCE OF THE STARS

These times present a call to individuals and communities to find new ways of being, to cultivate courage and a deep recognition for the interconnectedness of life in all its visible and invisible forms. This series of online presentations will explore heart thinking and the development and evolution of the Etheric Heart to find greater strength and insight to meet these challenges. Using storytelling, shared research, visual and meditative exercises, and conversations, we will deepen our appreciation and understanding of the transformative capacity of the heart as an instrument for spiritual perception and heightened social consciousness.

THE HEART IN THE RADIANCE OF STARS

March 5th 2.00 – 4.00 online

SHORT SESSION DESCRIPTIONS AND BIOS

Iris Curteis is an accomplished storyteller; her background includes studies in visual arts, speechformation & dramatic arts (Europe), BA & BA hon. (Creative Writing) and a PhD focussing on Storytelling and Community Building. She has been working out of anthroposophy for over 40 years.

Folktales - Imaginations of Heart Thinking: True representations of the spiritual world proceed from heart thinking. Immediate apprehension, attained through heart thinking, instantaneously reveals whether something is true or false. To enter into higher worlds, we also need a new understanding of so-call contradictions. I will explore heart thinking through carefully chosen folktales, provide you with an experience of liminal space created through storytelling and invite you to engage with characters who act out of immediate apprehension, and unfolding imaginations that guide us towards a more layered and complete picture.

Irmhild Kleinbenz holds Post Grad. Diplomas in Applied Science and Integrative Medicine, and an International Post Grad Cert Anthroposophic Medicine. Her work as Integrative Medicine Health Consultant and Anthroposophic Naturopath is endorsed by the Medical Section, Goetheanum. She is a passionate and knowledgeable Lecturer, Tutor, and Mentor for International Post Graduate Training in Anthroposophic Medicine; and an ND, Accredited Fellow of the Australian Natural Therapists Association for Homoeopathy, Naturopathy, Nutrition and Herbal Medicine. She offers her wealth of knowledge as a School Health Consultant and in Teacher Education. She has retired to NSW and continues to research various aspects of global health issues.

Healing Practices for The Etheric Heart asks: what do we know about the separation of the physical and etheric heart? Irmhild will explore the effects of this separation and the distorted rhythms that arise as a consequence of this split. The heart is a pioneer in embryological development. So too, the etheric heart and the astral heart pioneers for moral life in the human being. We will look at how human health is influenced by illness or preventative interventions such as the recent increase in pericarditis in the younger generation, especially during the period of the development of the etheric heart.

Deirdre Korobacz holds a M Ed (Steiner Ed), Dip Ed, Ad Dip Graphic Design, Dip Fine Arts. She has worked as an inspiring visual artist, educator and mentor with over 40 years of experience in Steiner education. She has cultivated a way to 'paint and draw the curriculum' and developed a lifelong interest in stimulating the arts through science and re-enlivening science through the arts. Deirdre initiated Shearwater's Wearable Arts Vision in Education (WAVE), in 2001, and carried the role of Artistic Director with enduring success.

Sensitising the Senses: Artistic activity and new ways of perception. All materials supplied.

Gillian Rogers holds a BA (hon English Lit.), Grad. Dip. Adult Ed., Post Grad. Cert (Professional Learning), MA (Steiner Education). She has worked in Steiner Education for over twenty-five years, most recently as a Steiner high school English teacher, Professional Learning coordinator and Head of Education.

The Future Waiting to be Born: These sessions will provide insights into the development of heart thinking and experience with exercises and observations from Steiner's work, using the growing body of research on the heart as an organ of perception as a reference point.
